

More competition on the Austrian gas market: GETEC ENERGIE expands its offering for large commercial customers in Austria at the beginning of 2025

Hanover, 23 January 2025: The German energy service provider GETEC ENERGIE GmbH (GETEC) is expanding its offering in Austria. As of January 1, 2025, GETEC also offers Austrian industrial and multi-site customers natural gas.

Since the beginning of the year, GETEC has been offering Austrian industrial and multi-site* customers also natural gas. The German company, which specializes in supplying B2B customers, has been active in the energy market since 2001 and offers commercial energy consumers in Germany, Belgium and the Netherlands supply options for both conventional electricity and gas products as well as supply solutions from renewable energy sources.

"The Austrian gas market is currently characterized by relatively little competition in the supply of large commercial customers," says **Cord Wiesner, CEO of GETEC**. "We are sure that the offer we can make to industrial and multi-site companies in Austria will be met with great interest".

GETEC was acquired by bp in August 2024, becoming part of bp's international gas & power trading business.

Jason Tate, VP European power trading & origination at bp says:

"The expansion of GETEC in Austria is another example of how bp is growing our European gas and power business. By integrating GETEC into our operations we can continue to develop our offering to new and existing customers by providing them with the energy they need."

GETEC is currently working to further expand its presence in Europe. The Hanover-based company plans to offer its comprehensive range of energy solutions from conventional and renewable sources to even more industrial and multi-site companies in other European countries.

* companies with very large numbers of consumption points.

Further information

Cautionary statement

In order to utilize the 'safe harbor' provisions of the United States Private Securities Litigation Reform Act of 1995 (the 'PSLRA') and the general doctrine of cautionary statements, bp is providing the following cautionary statement. This document contains certain forecasts, projections and forward-looking statements – that is, statements related to future, not past events and circumstances – with respect to the financial condition, results of operations and businesses of bp and certain of the plans and objectives of bp with respect to these items. These statements are generally, but not always, identified by the use of words such as 'will', 'expects', 'is expected to', 'targets', 'aims', 'should', 'may', 'objective', 'is likely to', 'intends', 'believes', 'anticipates', 'plans', 'we see' or similar expressions. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will or may occur in the future and are outside the control of bp. Actual results or outcomes, may differ materially from those expressed in such statements, depending on a variety of factors, including the risk factors discussed under "Risk factors" in bp's most recent Annual Report and Form 20-F as filed with the US Securities and Exchange Commission and in any of our more recent public reports.

Our most recent Annual Report and Form 20-F and other period filings are available on our website at www.bp.com, or can be obtained from the SEC by calling 1-800-SEC-0330 or on its website at www.sec.gov.
