

bp pulse keeping Aussie EV wheels turning

3 NOVEMBER 2023

bp pulse, our EV charging network, has picked up speed, adding more than 100 fast charge points to the country's EV network since November 2022.

This is a big step toward bp's goal to roll out 600 EV charge points across Australia by the end of 2025.

Matt Elliott, vice president, bp pulse Asia Pacific said: "Our team has turned strategy into action by rolling out charge points rapidly this year, and we're on the road toward our 2025 target.

"By providing fast, reliable chargers across the country we hope to support Australia's transition to EVs and break down barriers that may be preventing prospective EV owners to make the switch."

Throughout 2023, bp pulse has announced key partnerships with [Uber](#) and [AGL Energy](#), to provide charging and incentives to participating drivers and households.

bp pulse has been operating in the United Kingdom for over 10 years and is now in Australia, New Zealand, China, Germany, India, Spain, Portugal and the United States.

Frédéric Baudry, president, bp Australia and senior vice president Mobility, Convenience, & Midstream, Asia Pacific said: "We're on the road to net zero and we're bringing our customers along for the ride. Putting EV chargers at the most convenient bp-branded locations across the country demonstrates our commitment to leading the evolution of mobility in Australia."

The electrification of mobility is part of bp's commitment to becoming a net zero company by 2050. bp supports Australia's emissions reduction target of 43 per cent by 2030 and net zero emissions by 2050.

About bp

bp has set an ambition to become a net zero company by 2050 or sooner, and to help the world get to net zero. Our team in Australia is working hard on our low carbon goals via alternative energy solutions, technology and as a gas producer.

bp has been operating in Australia for more than 100 years and is one of Australia's leading premium fuel retailers with around 1,400 branded retail fuel sites across the country, of which approximately 350 are company-owned, and more than 1,000 are owned and operated by our independent business partners.
