Re: Equipment Provided to SPPD

On behalf of BP, operator of the Baku–Tbilisi–Ceyhan (BTC) Pipeline, a quarterly audit and inspection was completed by Bowman Risk Management over the period 17 September–02 October 2013, of equipment provided to the Strategic Pipeline Protection Department (SPPD). All such equipment is non-lethal and non dual-use.

This equipment was provided in accordance with the Agreement between the BTC Pipeline Company and Government of Georgia on the Provision of Security Equipment, Facilities and Operations Funding for the BTC Pipeline Project (the Agreement) and its Amendment dated on or about 18 January 2006.

The audit found that all equipment provided under the Agreement was being stored and utilised by the SPPD in compliance with the terms of the Agreement and its Amendment.

Yours sincerely,

Peter Phelan
Director
