## Tangguh LNG and SKK Migas support digital education at SMA Negeri Aranday in Teluk Bintuni

**Tomu District, Teluk Bintuni Regency** – Tangguh LNG and SKK Migas donated new computer lab to SMA Negeri Aranday in Tomu District, Teluk Bintuni Regency, Papua Barat Province on 11 November 2024. The donation included 25 personal computers (PCs), UPS (uninterruptible power supply) units to keep the computers running during power outages, as well as printers, projectors, and other equipment. These resources aim to improve students' learning experience and help them prepare for the digital world.

Samuk Konyorah, social performance and delivery manager at bp Indonesia, said this support is part of Tangguh LNG's effort to bring technology-based education to Papua.

"We want this facility to benefit not just ICT (information and communication technology) classes but all subjects, helping students expand their knowledge and prepare for the future," he explained.

ICT classes teach basic computer, internet, and communication technology skills to help students access, manage, and share information.

At the handover ceremony, attended by teachers and students, the school principal's representative, Isak Ruben Aninam, expressed his appreciation for the support. "This support improves the teaching and learning process, especially in preparing students to tackle global challenges," he said.

Students at SMA Negeri Aranday use computers donated by Tangguh LNG and SKK Migas in their studies

Students and teachers welcomed the new facilities. Nurfadilah, a 12th-grade student, said the computers make learning easier, while biology teacher, Ida Setiawati added that the equipment will help with technology-based lessons.

Tangguh LNG, operated by bp Indonesia, is committed to creating a positive impact on the communities of Papua Barat. In addition to its operations, Tangguh LNG runs social programmes to improve education, health, governance, and entrepreneurship, helping to empower and support sustainable community development.
