# Welcome

“The progress on the GTA phase 1 development is as exciting as ever as we head towards the final stages of the project. Since our last edition we continue to advance, witnessing the first helicopter landing at the offshore Hub where earlier this year some of our stakeholders, were able to visit. 2023 so far, has also been full of key events and engagements, I am glad to share these with you over the pages of this Gazette!”

**Mohamed Limam**

vice-president and  
head of country,  
Mauritania

“Our teams are strongly progressing bringing together this world-class gas project as you can read over the coming pages. We are also continuing to work with governments and partners and investing in-country to build regional long-term success. Now, more than ever, is an invigorating time for bp and our partners in Mauritania and Senegal”

**Massaer Cisse**

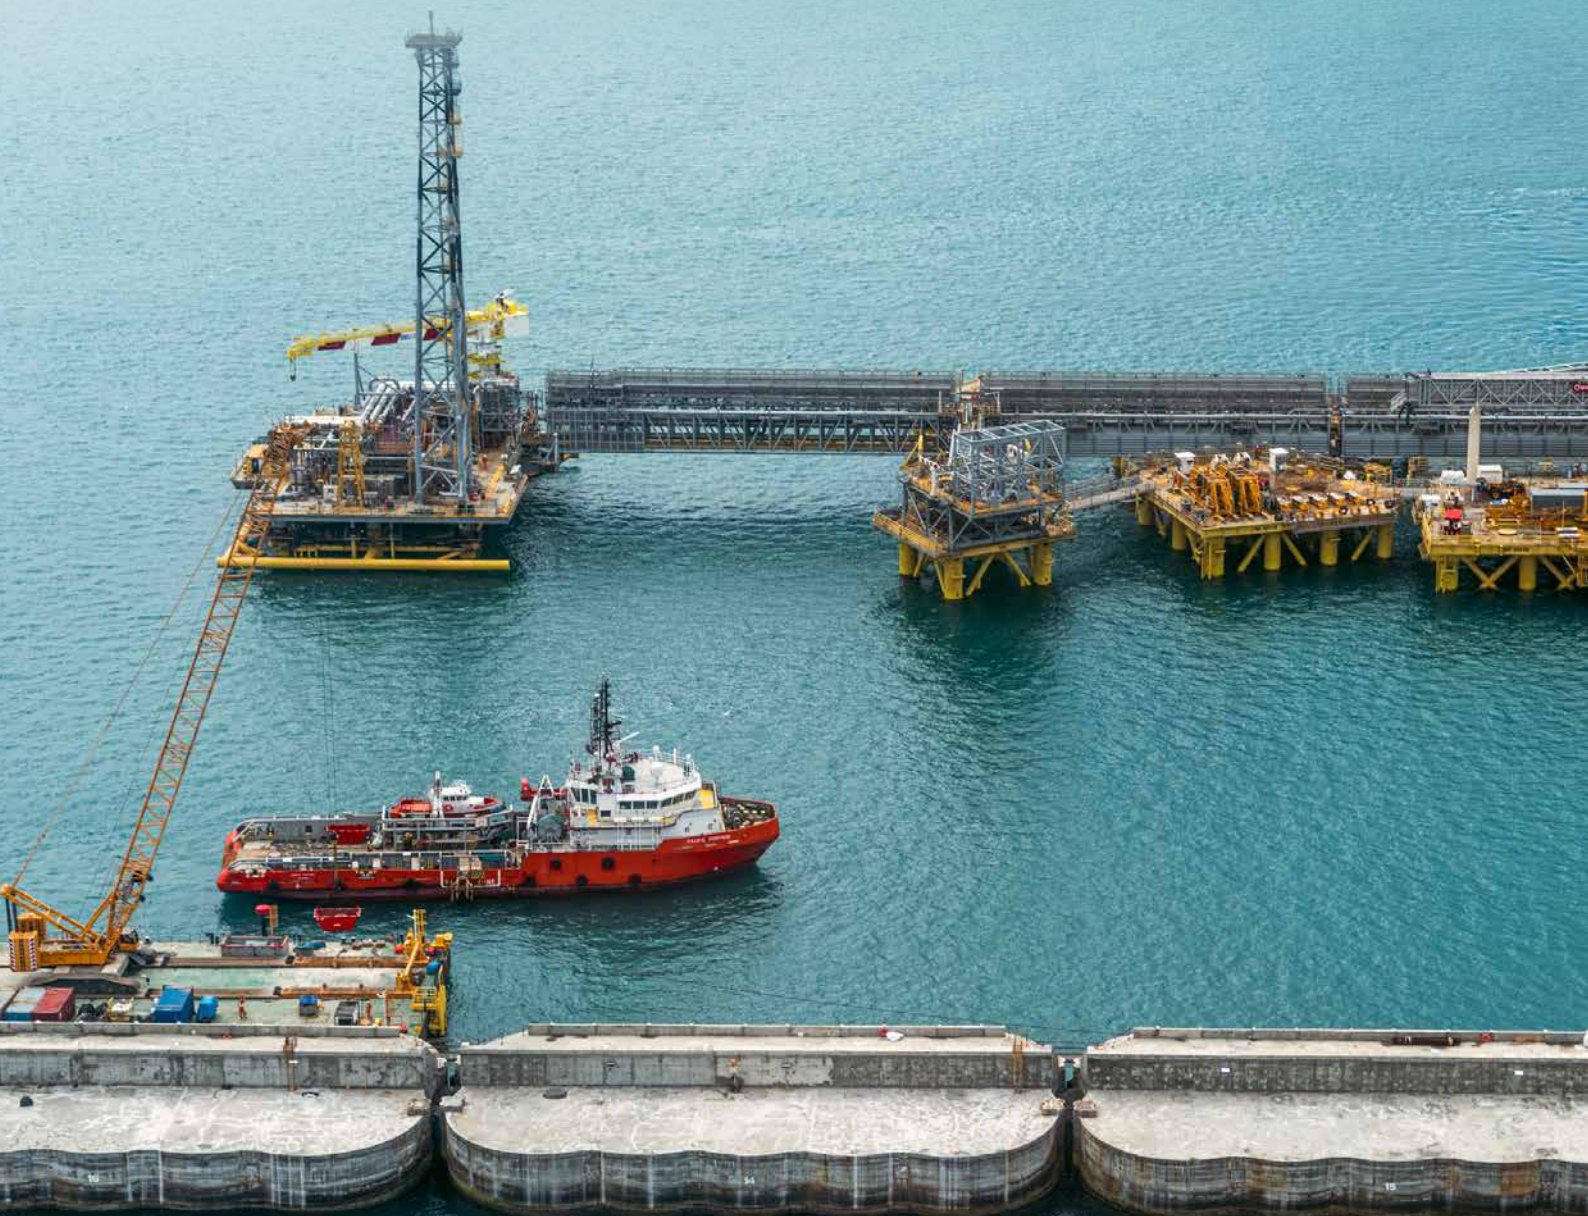

vice-president and  
head of country,  
Senegal

## Greater Tortue Ahmeyim (GTA) project

# GTA highlights

### GTA Phase 1 progress

Thanks to the commitment and dedication of our people, GTA Phase 1 continues to make good progress towards delivering individual scopes and integrating this global project offshore Mauritania and Senegal. Here is the latest news from the project delivery lines...

The riser platform at the Hub

FPSO during Singapore pit-stop

## Subsea

Installation activities continue offshore Mauritania and Senegal. The installation vessel is operating in the GTA field to lay the deepwater sections of the two production flowlines from the wellheads in 2850m water depth to the floating production, storage, and offloading (FPSO) vessel. Once moored in its final location, the FPSO will sit in ~150m water depth.

Pipelay activities offshore

## FLNG

Commissioning of the floating liquefied natural gas (FLNG) equipment packages continues to make good progress in Singapore. A critical milestone was achieved in May 2023 with the start of dynamic commissioning of the first steam turbine generator,

which will provide power when the vessel is installed at its final location at the Hub. Our team at the shipyard in Singapore, as well as at the FPSO, were excited to recently host delegations of Mauritanian and Senegalese officials, enabling officials from both countries to see progress on the ground for themselves. Read more about this in the events and engagements section.

## FPSO

The FPSO has now completed its pit-stop in Singapore, where the team needed to conclude some additional installation scope. It is now progressively continuing the journey to its final offshore location where the in-country teams have been preparing for its arrival. The vessel will have sailed 12,000 nautical miles in total before it will be moored in place and commissioning can commence.

## Hub

Work is progressing well towards enabling the handover of the management of the Hub

The distance the FPSO will travel to the Hub

# 12,000

nautical miles

Ongoing FLNG construction in Singapore

from the projects team to the operations team. Scaffolding has started to be dismantled and the first system handover has been achieved, a great success for the offshore teams. Over 70 people have transferred from the flotel, a vessel moored at the Hub providing temporary accommodation during construction, to start living onboard the Hub quarters and utilities (QU) facility. In June 2023, the flotel successfully departed, marking the start of a new offshore phase. This, together with the first helicopter flight safely received at the QU, displays significant strides forward.

## Greater Tortue Ahmeyim (GTA) project

# GTA spotlight

### Spotlight on FPSO sailaway

A major project milestone was achieved earlier this year on 20 January 2023 when, following the successful completion of a series of sea trials, the GTA Phase 1 FPSO safely set sail from the shipyard in Qidong, China.

Celebrations for the FPSO completion in China

Its onwards journey, totalling 12,000 nautical miles, will see the state-of-the-art vessel towed to its final destination at the GTA development, situated 40km offshore on the maritime border of Mauritania and Senegal. Upon arrival the vessel will be moored in ~150m deep water, attached to the seabed via 16 pre-installed mooring chains, each 380m long and weighing a total of more than 6,000 tonnes.

The sailaway was a fantastic achievement for the project. Delivered through a challenging environment, including the COVID-19 pandemic, the team managed to keep safe operations

at the core of everything they have done.

The FPSO is a key part of the GTA gas development, responsible for processing 500 million standard cubic feet of natural gas per day, before transferring it by pipeline to the FLNG facilities 10km offshore. This project is a great example of resilient hydrocarbons in bp's strategy and is expected to have a lasting and positive impact for generations to come.

The FPSO will process  
**500 million**  
standard cubic feet of  
natural gas per day

## Spotlight on first helicopter landing at the Hub

April 2023 saw an important transition take place with the landing of the first helicopter flight on the helideck of the QU facility, located in Senegalese waters at the GTA Hub.

This achievement took a lot of work behind the scenes, collaborating with Senegal's civil aviation authority (ANACIM) to undertake the necessary helideck inspections and get the required certification in place.

This great work culminated with the arrival of the first helicopter crew change flight on 24 April 2023; with nine passengers onboard from ANACIM and bp.

This marks a big change for the team working on the Hub as it transitions from a journey that took roughly six hours by sea, with the risk of bad weather, to a 45-minute journey in relative comfort. Although not everyone is yet crew changing via helicopter, following this approval six flights per week were running from June with an intent to move up to 16 flights per week in the

ANACIM officials travelling to the Hub on first flight

First helicopter received at the Hub QU facility

Hub distance  
from the  
mainland

10  
kilometres

near future. This is a great step forward for the team and shows the progress bp and partners are making to starting-up an operational facility.

This process will be repeated with Mauritania's National Agency of Civil Aviation, when the FPSO arrives to Mauritanian waters later in 2023.

## Events and engagements

# Sharing our progress

### bp sponsors the 20<sup>th</sup> International Exhibition of Energy and Petroleum in Africa (SIEPA)

This year, the SIEPA was held at the King Fahd Hotel in Dakar on 7 and 8 March 2023. The event was organised by the Association for the Development of Energy in Africa and the Senegalese Associated for the Development of Energy in Africa.

SIEPA is an opportunity for stakeholders to exchange views on oil and gas production prospects, on local content in the oil and gas industry and hydrocarbon governance. It is also an opportunity to discuss issues relating to training, access to finance, the development of renewable energy generation capacity and developments in

electricity markets. The wide-ranging debates attracted considerable public interest.

Professionals from the oil, gas, electricity and renewable energy industries, energy sector stakeholders and the Senegalese government and administrations were brought together to discuss the future of the energy sector in Africa.

bp's project support manager in Senegal, Abdoulaye Niang, provided the audience with an update on the GTA project and its various components. He also gave an overview of the development of bp's comprehensive social investment programme in country, aimed at improving the quality of life of the local communities in region.

bp represented by business advisor Mariama Ndao (first from left) and project support manager Abdoulaye Niang (third from left) with other SIEPA attendees

### bp and partners announce GTA Phase 2

On Friday 24 February 2023 bp and partners confirmed the development concept for the second phase of the GTA liquefied natural gas (LNG) development, that will now be taken forward to the next stage of evaluation.

The partnership, comprised of bp, PETROSEN, Société Mauritanienne des Hydrocarbures (SMH) and Kosmos Energy, agreed a concept that expands on existing GTA infrastructure, includes new wells and subsea equipment, but will also evaluate a gravity-based

“We aim to build on our strong collaboration with our partners, and the governments of Mauritania and Senegal, to further develop a long-term, successful energy hub in West Africa. GTA continues to underpin our strategy to develop the most resilient hydrocarbons to help provide energy security today.”

**Gordon Birrell, bp's executive vice president for production and operations**

structure (GBS) as the basis for the GTA Phase 2 expansion project. The additional LNG production is estimated between 2.5-3.0 million tonnes per annum.

GBS LNG developments have a large tank sitting on the seabed with the structure providing LNG storage and a foundation for liquefaction facilities.

## Mauritanian and Senegalese delegations visit FPSO and FLNG in Singapore

The bp team organized visits to Singapore for delegates from Mauritania and Senegal. From 9-14 March 2023, representatives from the Ministry of Petroleum and Energies of Senegal, led by the Director of Hydrocarbons, Papa Samba Ba, visited the FPSO and FLNG sites. Between 17-18 April 2023, delegates from SMH, including the Director General Tourad Abdel Baghi and his colleagues were welcomed on the facilities.

At the FPSO, both parties were hosted by Graeme Chapman, bp's project general manager for hook-up and commissioning, and the projects team. This included a tour of the facilities and project update

Senegal Government delegation led by the Director of Hydrocarbons, Mr Pape Samba Ba

presentation, which was well received by the invited guests.

bp also hosted an FLNG visit at the Keppel yard. While the construction was ongoing, the delegation had opportunity to visit the vessel, familiarize themselves with the GTA assets and received a project update presentation.

These visits provided the Mauritanian and Senegalese representatives an opportunity to capture the scale of the project's assets and put any questions they had about the FPSO and FLNG to the site team. It was informative, enlightening, and further cemented relationships between bp and its key stakeholders.

Mauritanian delegation led by Mr. Tourad Abdel Baghi, Director General of SMH (centre)

## bp participates in the fourth roundtable on mineral resources governance in Senegal

The Observatory for Monitoring Economic Development Indicators in Africa (OSIDEA) is a non-profit organisation that promotes the evaluation of public policy governance and electoral processes. OSIDEA annually organises a roundtable event to discuss mineral resources governance in Senegal with its key partners, namely the Ministry of Oil and Energy, bp, Woodside and Société Pétrolière du Sénégal (PETROSEN).

The roundtable brings together numerous stakeholders such as the state, civil society, public institutions, the private sector and oil and gas operators in Senegal. bp participated in the fourth edition of this event, held in Dakar on 10 January 2023, under the theme 'Strategies to build bridges of the energy transition around oil and gas'.

bp has been a partner of OSIDEA since its launch. This round table, which over the years has become an essential platform for exchanges on the challenges of hydrocarbon exploitation, offered participants a better understanding of the prospects for socio-economic development

from a national, sub-regional and international perspective. The Minister of Petroleum and Energy, Her Excellency Aissatou Sophie Gladima gave the opening remarks of this edition.

The roundtable was also an opportunity for bp's vice-president and head of country Senegal, Massaer Cisse, to share an update on GTA's progress, including project activities that are having a positive impact on our communities and stimulating socio-economic opportunities for our stakeholders in Mauritania and Senegal.

# Hub visit

Saint-Louis Governor, Alioune Badara Samb, visiting the Hub with external affairs manager, Senegal, Fatimata Sow

## Mauritania and Senegal Governments visit the GTA Hub

The GTA team welcomed officials of the two host governments offshore to the Hub in April 2023, as the project entered a critical phase. Emil Ismayilov, senior vice president for Mauritania and Senegal, showed the special guests around the Hub facilities.

Emil Ismayilov delivering a short speech to guests

Guests of honour included Abdessalem Ould Mohamed Saleh, Minister of Petroleum, Mines and Energy for Mauritania, and Aissatou Sophie Gladima, Minister of Petroleum and Energies for Senegal. Also present were Alioune Ndoye and Lalya Kamara Ministers of Environment and Sustainable Development for Senegal and Mauritania respectively, as well as representatives of bp's project

partners, PETROSEN, SMH and Kosmos Energy.

### Local authorities from Saint-Louis also visited the GTA Hub.

Following on from this visit, in May 2023 bp also welcomed representatives from the Saint-Louis Governance and Municipality, including Alioune Badara Samb, Governor of Saint-Louis, on the GTA Hub.

Welcome visitors included the Prefect of the Saint-Louis Department, the Director of the Regional Fishing Service, as well as the Defence and Security Forces of the region.

Both visits were an opportunity to strengthen ties with authorities and our key stakeholders, at local and ministerial level, and for them to witness the project's progress as well as meet the teams involved in the construction.

These visits help show bp's focus and commitment to safety and security issues in the work zone, strengthen relationships and were an excellent opportunity to show the progress and hard work to date and create anticipation for what's still to come.

Officials from two host countries, offshore at the Hub with bp staff

## Labour rights workshops in Mauritania and Senegal

As part of local content strategy, bp held a labour rights workshop, on 16 and 19 May 2023 in Nouakchott and Dakar respectively. The workshop was attended by over 100 local suppliers from a variety of industries, including logistics, transportation, and catering in Mauritania and Senegal.

The day was filled with informative sessions led by bp's people and culture team and leaders in the field of labour rights. Attendees had the opportunity to gain new insights

Mauritania workshop

into bp's expectations in terms of labour rights, as well as learn about labour rights' role in protecting and promoting worker welfare.

Throughout the workshops, participants engaged in interactive group activities and discussions, which helped them to connect

with one another and share their own perspectives and ideas.

By the end of each day, attendees had developed a deeper understanding of labour rights and learned strategies for implementing them within their businesses to meet their legal, social, and contractual obligations.

Senegal workshop

## Workshop with local artisanal fishing council of Saint-Louis

In May 2023, bp participated in a consultation workshop with the Saint-Louis artisanal fishing community, organized by the local artisanal fishing council of Saint-Louis which represents a significant number of fishing associations across the region.

A key objective was to reinforce the collaboration between bp, partners and the local fishing community as stakeholders strive for sustainable fishing practices alongside gas extraction. These consultations also provided an opportunity to discuss co-habitation at sea and safety within the GTA work zone.

The meeting was chaired by the Saint-Louis Prefect and saw the presence of notable figures from Guet-Ndar, a key fishing community in Saint-Louis, and our partners Kosmos and PETROSEN. bp's team led by external affairs manager for Senegal, Fatimata Sow, participated in the meeting

where senior community liaison officer Alioune Dieng and fishing liaison officer Amadou Ndiaye led presentations delivering key safety information about GTA.

By participating in these consultations and key discussions, bp is better able to engage with local communities to mitigate risks and contribute to

the safe and smooth delivery of GTA Phase 1.

Modou Ndiaye, Prefect of Saint Louis with representatives of the fishing associations and bp's Fatimata Sow

## bp participates in Mauritania Investment Forum

On 15 March 2023, bp took part in the Mauritania Investment Forum organized by the Mauritania Investment Promotion Agency and the Organization of Islamic Cooperation (OIC). The forum was chaired by His Excellency Mohamed Ould Bilal Messoud, Prime Minister of Mauritania, and Hissein Brahim the Secretary General of OIC. The purpose of this event was the promotion and development of investment in Mauritania to the 56 OIC Member States.

bp was represented by Asma Dey, finance manager for Mauritania and Senegal, who participated in a panel discussion under the theme 'Mauritania rising, climbing to the next level'. Asma shared bp's success story in Mauritania and the valuable and sustainable partnership between bp and the Mauritanian government. This was a great opportunity to signal bp's long-term commitment to the region and alignment with Mauritania's energy transition goals.

Engagements and sponsorships

# Saint-Louis Jazz Festival

For the second year in a row, bp sponsored the international Jazz Festival in Saint-Louis, which took place between 25-29 May 2023. This prestigious cultural event is a celebration of art and culture that plays an essential role in the social development of the St. Louis region.

The festival provided a great opportunity for both world famous names and young Senegalese and African artists, introducing them to new audiences and providing a meeting hub for like-minded musicians.

At this year's festival, bp hosted a stand where tourists and locals alike heard more about the GTA project and the benefits it can bring to local communities.

Parallel to the Jazz festival, bp's Massaer Cisse hosted an exclusive event on Saturday 27 May to spotlight TEX, a young rising artist from Langue de Barbarie, in Saint-Louis, giving him the opportunity to perform a live acoustic set at a world-renowned festival.

Massaer Cisse at the Saint-Louis Jazz Festival

bp sponsors the Jazz Festival

## bp sponsors King Charles' birthday celebration in Nouakchott

bp had the opportunity to sponsor the recent birthday celebration of His Majesty King Charles III, hosted by the UK embassy in Nouakchott, Mauritania. It was an honour to contribute to such a special occasion.

Heartfelt congratulations went out to His Majesty on his special day, and bp wishes him all the best for the years ahead as the new King of the United Kingdom.

Collin Wells, UK ambassador for Mauritania with Ismail Sidahmed, Country Manager for Kosmos and bp staff

## bp supports the EITI Conference in Dakar, Senegal

The ninth Extractive Industries Transparency Initiative (EITI) conference was hosted for the first time on the African continent in Dakar, Senegal and took place from 13-15 June 2023.

EITI is a multi-stakeholder organisation, whose goal is to promote transparency and good governance of oil, gas, and mineral resources. Senegal has been a partner since 2013. This year's flagship conference marks their 20<sup>th</sup> anniversary and brought together over 1,000 stakeholders from around the world to reflect on the management of natural resource transparency and to set future priorities for EITI implementation.

Honoured guests included His Excellency Amadou Ba, Prime Minister of Senegal who delivered the opening remarks and His Excellency the Prime Minister

Emil Ismayilov and bp delegation at the EITI conference

of Mauritania, Mohammed Bilal Messoud who received the 2023 EITI Chair Award for Mauritania.

Also present was Emil Ismayilov and bp's Ivanka Mamic, senior vice president sustainability. Along with the global conference,

the EITI announced its new board, where Ivanka was nominated to represent bp. The board consists of a tri-partisan group of stakeholders from EITI implementing and supporting governments, civic society, and companies.

The Senegalese government successfully hosted this first global conference in Africa and it is with pleasure that bp shall continue to play an integral role in supporting Senegal's energy transition goals.

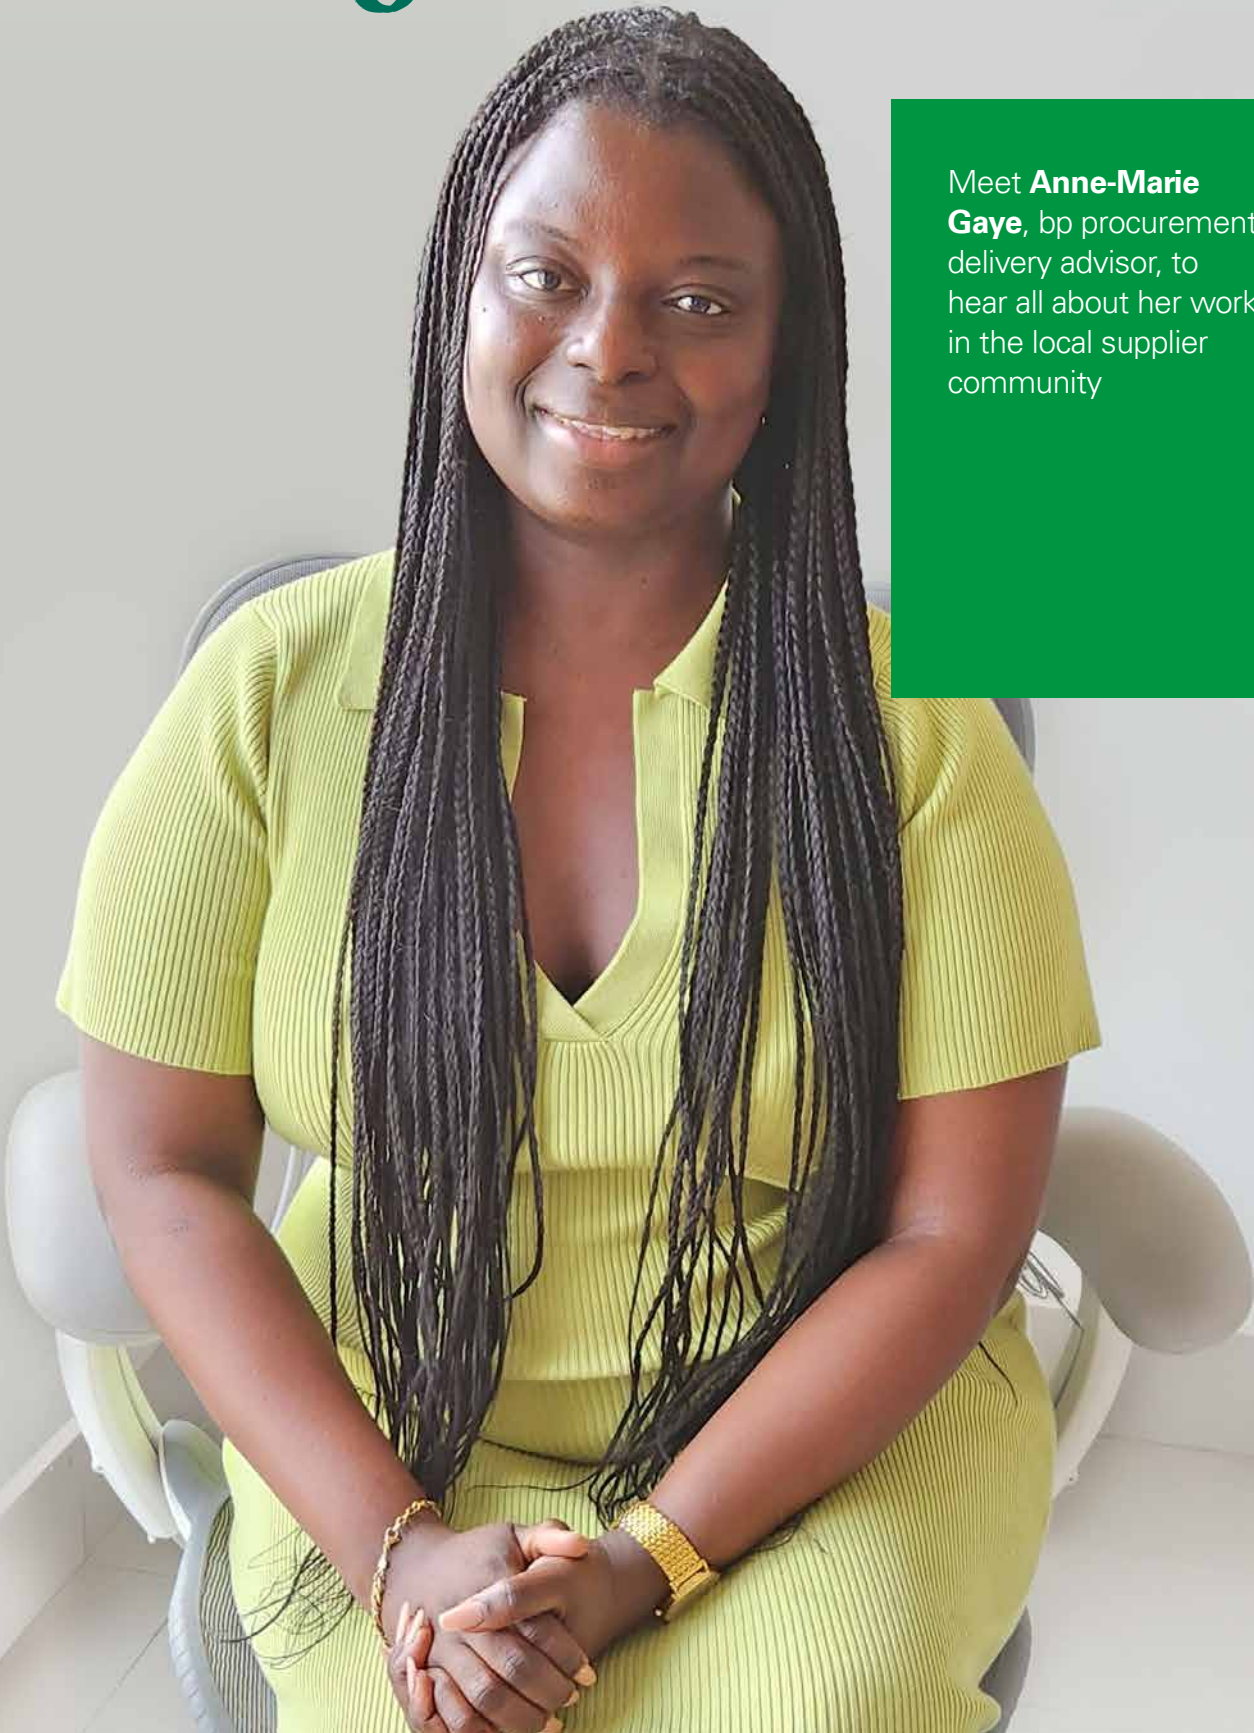

The EITI conference

# Get to Know

Meet **Anne-Marie Gaye**, bp procurement delivery advisor, to hear all about her work in the local supplier community

**Tell us about your role within bp?**

I am part of the business facing procurement team looking after the GTA project. I am responsible for providing support and guidance on all aspects of the procurement processes. I work with internal stakeholders to develop and implement strategies to deliver efficient and cost-effective contracts to support our upcoming production activities. I also ensure all related procedures are compliant with applicable regulations and standards. Finally, I am heavily involved in the implementation and delivery of bp’s local content strategy in Mauritania and Senegal.

Anne-Marie Gaye presenting Supply Chain principles to Suppliers

**What do you feel is the most important aspect of your role?**

I believe it is to contribute to bp’s local content strategy in the region. Local content is important to bp and its partners as it assists the economic growth of the region as well as providing valuable services to the energy sector. Local content ensures that a portion of the revenue earned from the industry will be reinvested back into the local economy. This provides job opportunities for the local community, increasing the value of the energy industry in Mauritania and Senegal. For me, being from the region, I find it

Anne-Marie Gaye responding to suppliers’ questions during a Supplier Engagement Workshop in Dakar

very rewarding to create value by ensuring that both countries benefit from the revenues of our operations.

**How do you encourage local companies to participate in the supply chain and how can they get involved with bp?**

Our team, together with a range of internal stakeholders, has developed innovative ways to integrate local companies in the supply chain. For example, we periodically hold supplier engagement sessions to explain the sourcing process to the local market as it can be quite protracted. We also encourage both local and international companies to seek partnerships with each other through consortia or joint ventures to deliver the scope. We also strongly encourage international companies to develop meaningful local content plans. Lastly, we also sometimes segregate contracts into smaller scopes of work to optimize opportunities for local companies to participate in the tendering process.

The bp supplier portal is an excellent online resource for finding upcoming opportunities as a supplier. The portal provides information about our upcoming tendering activities and allows suppliers to register their interest for working with bp. On the portal you can also learn more on bp’s procurement processes, as well as the standards required to deliver services to a world class energy project like GTA.

# Workforce Development

## Apprentice technicians' global deployment

As of June 2023, the majority of our apprentice technicians have departed from technical college in Scotland and have arrived at their global assignment locations.

This phase of their multi-year training programme will see them undertaking assignment-based technical training, helping transform them from apprentice technicians, into fully fledged

Khadijetou 'Tata' at her graduation ceremony in Scotland

operators. Training is rigorously assessed via evidence-based tasks, with competence measured against the internationally recognized Scottish Vocation Qualification (SVQ). Upon successful completion of the programme, they will gain an SVQ3 from Forth Valley college in Scotland, where they began their technician journey.

Operating regions providing on the job training are Trinidad and Tobago, Azerbaijan, Oman and Indonesia. We spoke to field technician Papa Ndiaga Ndoye from Senegal, who is currently based both offshore and onshore in Trinidad and Tobago. Papa had these motivational words for future bp joiners, "working with bp requires a lot of commitment to safety, because that's what matters. You will find great pleasure to work with bp."

Field technician Khadjetou 'Tata' Cheikh Mohamed Vade, from Mauritania, is currently based in Azerbaijan. She commented that what excites her about her new role is she can now "know how things really work" and "can discover the work environment in a real offshore platform." Tata went on to say, "as I progress

Papa (middle) at Glasgow Caledonian University mixer with fellow technician Amadou Fall (left) and bp's Cheerliche Eccles (right)

in my assignment, I'm mostly looking forward to representing my country positively and to be able to come back with more experience and knowledge to the GTA project."

We wish all our apprentices good luck in their global assignments and look forward to welcoming them back to Mauritania and Senegal upon successfully completing their programme. Upon returning to the GTA project, they will bring valuable knowledge and expertise to contribute to the future success of the region.

Apprentice technicians' Rokhy Ndiaye (left), Papa Tall (middle) and Papa Ndiaga Ndoye (right)

## Update from the National Institute for Oil and Gas (INPG)

The INPG in Dakar is a national institute that plays a key role in the

development of Senegal's energy sector. bp has been supporting the INPG since 2018; last year in 2022, bp signed a memorandum of understanding to continue our support for another 4 years. bp has already supported scholarships and internships and continues to provide financial aid to the institute.

Cohort of INPG students

The third cohort of INPG students specializing in the oil and gas industry, kick started a Masters in Oil and Gas Engineering course in October 2022. The students continued their theoretical training at the centre until the end of June

INPG students at the GTA Hub

2023. After taking a short break, their practical hands-on training should begin in September 2023 in an international location.

The former cohort of 2021-2022 have been hired at companies such as ICS SENELEC, Ministry of Petroleum and Energy and others. They have also benefited

from exchange and sharing sessions with SAIPEM, Wärtsilä and SLB.

INPG trainers also made a second trip to Mauritania to deliver a new training session to staff from the Senegal-Mauritania Joint Tax and Customs Unit. The theme was 'The development of offshore fields- the GTA case'. The aim of the session was to take a closer look at the development of Exploration and Production projects, the issues at stake and the involvement of subcontractors in the various components and sub-components, specifically in the case of GTA.

## Update from Nouakchott Interactive Training Centre (NITC)

Over the last six months, in partnership with bp, the NITC have

continued to offer a wide range of workshops and trainings to a host of stakeholders including ministry and local stakeholders. These trainings were delivered by subject matter experts from bp and have been designed to help our stakeholders in Mauritania gain more knowledge and experience of the energy sector.

The trainings have covered a variety of topics including bp's values and behaviours, bp's code of conduct, International Association of Oil and Gas Producers – IOGP – lifesaving rules, bp safety leadership principles, ethics and compliance 101, and anti-bribery and corruption. bp also engaged with an industry leading training provider to offer a consultancy service for the NITC to help them with their future plans.

Providing access to high quality training and development opportunities for local people to upskill in this industry is one of the key objectives of our local content strategy. Future sessions are currently being planned.

Over **150**

hours of training so far in 2023

Local content

# Social investment update from Mauritania

## Improve access and quality of primary health care services in Ndiago

bp and its joint-venture partners, Kosmos and SMH, have invested in social investment programmes that aim to enhance the quality of life in the communities where we operate. Health is one of the main focus areas.

Some villages nearby Ndiago lack access to basic healthcare services due to limited transport options and local medical services. For some, these constraints mean they often don't seek the care needed.

Our health programmes, launched in 2020 aim to promote the health of the Ndiago community by strengthening access to, and quality of, primary healthcare services. Now in 2023, this has been achieved through community awareness-raising on health and sanitation, focusing on basic healthcare and endemic diseases, mother-child healthcare, malnutrition, prevention of STIs, HIV/AIDS, hygiene, and water. Door-to-door awareness campaigns, and the setup of 'medical caravans', travelled around the villages in the form of mobile clinics, thanks to implementing partner SOS PE, improving the accessibility of health care for the population.

The programme has also assisted local healthcare providers in improving their technical capacity by providing training for community workers, and essential equipment to support local health personnel. Four health centres have been rehabilitated, granting pregnant women in the municipality of Ndiago with professional health support for their labour. For occasions such as these, an emergency response service has also been introduced that meets the needs of community members.

Community Free Medical consultation in N'Diago Health Centre

**"The health project in Ndiago has considerably contributed to the wellbeing of the community"**

**Doudou Geuye,**  
Ndiago community leader

Medical centre in N'Diago community

# Social investment update from Senegal

## Improve access and quality of primary health care services in Saint-Louis

Since 2020, bp and its joint-venture partners, Kosmos Energy, PETROSEN, have been investing in the community health programmes in Saint-Louis.

Medical consultant in Gandiol

To support access to health care for the Saint-Louis population, activities for a mobile clinic began in October 2020. The execution of the programme coincided with the COVID-19 pandemic, consequently coinciding with restrictions on gatherings of people. First activities were therefore devoted to strengthening advanced strategies for vaccinating children in remote areas of Gandiol and raising awareness of disease prevention.

November 2022 saw the mobile clinic's activities begin holding free

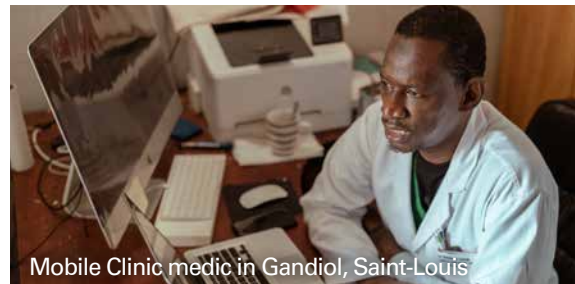

medical consultation campaigns for populations and especially women and children.

The Mobile Clinic approach has strengthened access to care for vulnerable populations, particularly in hard-to-reach areas, and enabled these populations to be consulted by a doctor or specialist for the first time.

The Mobile Clinic is organized in collaboration with several partners including:

- The Medical Region of Saint-Louis
- The Sanitary District of Saint-Louis
- Postal care providers in targeted areas
- Community leaders and traditional chiefs at the local level
- Community-Based Organisations and community relays
- Other partners involved in health at the local level.

This approach complements the health system. It creates a link between the community and healthcare providers to facilitate referral and attendance at health facilities.

Mobile Clinic medic in Gandiol, Saint-Louis

**“We thank bp and its partners for this important activity that has allowed us to benefit from health services that are difficult for us to access for various reasons. The mobile clinic with awareness allows us to pay better attention to our health and to use care services when necessary”.**

**A member of the Gandiol community**

Mobile clinic in Saint Louis
